FullStack Developer

I'm a Fullstack MERN Developer specializing in Nods.js ,Express.js, React.js and Redux. Skilled in building scalable and secure API with MongoDB, developing user-friendly frontend and ensuring performance, reliability and maintainability. Experienced in collaborating effectively in remote , team-driven environment.

Skills

Frontend - JavaScript, React js, Redux, Tailwind CSS, HTML, CSS

Backend - Node.js , Express js, Django,

Database - SQL, MongoDB

Languages – JavaScript , Java , Python

Tools - JWT, Bcypt Gensalt, Git, Github, Postman, JIRA , Docker

Soft Skills: leadership, Team Collaboration, Public Speaking, Time Management , Problem Solving.

EXPERIENCE

Baoiam innovations pvt. Ltd , Bangalore Aug 2024 – Sep 2024
Mern Developer internship | Back-End

- Created and tuned RESTful APIs using Node.js and Express and got data three times faster.
- Worked on teams in an Agile organization to create and include new features without difficulties.
- Better code structure in the frontend and performed code reviews, reduced page load time by 25% and increased UI performance.
- Developed and optimized React.js and Tailwind-CSS based UI components to provide the fully responsive design across the board..

Education

Ramaiah Institute Of Technology , Bangalore October, 2024 -Present.

Master of Computer Applications (MCA) , CGPA: 8.5/10.

Courses: Design and Analysis of Algorithms, Artificial Intelligence, machine learning, Networking, Databases, FullStack.

Presidency College, Bangalore Oct - 2021 to June 2024.

Bachelor of Computer Applications (BCA) , CGPA 8.2/10.

Courses Data Structures with C, AR/VR, Operating System, Networking, Web Technologies Software. Enginnering

Projects

FacePay (Face Activated Payment method)   https://github.com/Be-A-Coder01/facePay

Technologies Used: face-api.js React.js, Node.js, Express.js, MongoDB, JWT, Blink-detection, Redux Toolkit, postman,
face-api, face-recognition and blink-detection to confirm user blinks before making payment.
Developed the front and and the backend in React.js, TailwindCSS and Redux and in Node.js, Express.js and MongoDB.
Added Razorpay to make payments using JWt to access the sites securely and MongoDB Compass to store user data.
It eradicates the use of passwords and authorizes payments supporting face activated payment procedure.

E-commerce Websit   https://github.com/Be-A-Coder01/ORI

Technology stack: React.js, Redux, Node.js, Express.js, MongoDB, Stripe, JWT, Bcrypt, Github, Multer, Postman.
Created a FullStack E-commerce application with React.js, TailwindCSS, Redux
Node.js, Express.js and MongoDB.
Managing Stripe payments with JWT and bcrypt implemented on-board secured
authentication and a personal Collection.
Created a mobile friendly interface and used postman to test backend APIs to make sure user experience was smooth.
